Amit Makwana

AI & ERP Integration Engineer | Odoo Developer | Python Automation

Bhavnagar, Gujarat, India | +91 84692 00948 | amitmakwana1225@gmail.com | linkedin.com/in/amit-makwana-829a9a24b

PROFESSIONAL SUMMARY

Odoo Developer with 3+ years of experience building custom ERP solutions, workflow automation, and Odoo modules across versions 11 to 20, now extending that foundation into AI integration. Worked on an Odoo Model Context Protocol (MCP) server that lets AI assistants such as Claude use tool calling against live ERP data, and developed a Claude skill for AI-assisted Odoo module migration. Proficient in Python, Flask, PostgreSQL, OWL JS, and REST API integration, with strong ERP architecture, access control, and business process automation skills. Seeking AI integration, automation, and advanced ERP roles.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (OWL JS), SQL, XML
ERP Development: Odoo, Custom Module Development, Odoo ORM, QWeb Reports, Access Control, Workflow Automation
AI Integration: Claude AI, Model Context Protocol (MCP), AI Tool Calling, AI-Assisted Code Migration
Backend & APIs: Flask, REST API Integration, ERP Integration, Mobile Backend Development
Databases: PostgreSQL, Database Design & Optimization
Developer Tools & Automation: Git, GitHub, Automated Publishing, Release Management

PROFESSIONAL EXPERIENCE

Odoo Developer — Keypress IT Services, Rajkot, Gujarat *August 2023 – Present*

- Contributed to the Advanced Odoo MCP Server product connecting AI assistants to Odoo via MCP and tool calling (see Projects).
- Developed a Claude skill that assists with migrating Odoo modules across framework versions.
- Designed and developed the company-wide internal ERP system on Odoo used daily across departments (see Projects).
- Built and published 50+ custom Odoo modules on the Odoo App Store under the company brand, serving hundreds of users across global businesses.
- Built an Automated App Publishing System and GitHub Release Management pipeline to streamline module deployment and versioning.
- Developed a custom Access Management module for fine-grained role and permission control beyond Odoo's standard setup.
- Developed OCM, a Python and Flask REST API mobile backend exposing Odoo ERP data and functionality to native mobile clients.
- Delivered ERP customizations across Sales, HR, and Retail, including automated reporting, multi-level approvals, and workflow triggers.
- Maintained module compatibility across Odoo versions 11 through 20, handling upgrades and migrations, and built interactive UI components with OWL JS and XML.

PROJECTS

Advanced Odoo MCP Server — AI-Powered ERP Integration | Keypress IT Services

- Contributed to an Odoo MCP Server product connecting AI assistants such as Claude, ChatGPT, Gemini, Cursor, and Grok to Odoo ERP through Model Context Protocol (MCP) and AI tool calling, so assistants act on real ERP data rather than only generating text.
- Enables natural-language ERP operations such as creating and managing sales orders, searching, viewing, creating, updating, and deleting records, and supporting invoice, bill, payment, purchasing, inventory, and delivery workflows for business process automation.
- Product capabilities include Odoo role-based access, OAuth 2.1 with PKCE, approval workflows for selected actions, and audit logs of AI requests, actions, results, and errors.

Internal Company-Wide ERP System — Odoo | Keypress IT Services

- Designed and developed a custom Odoo ERP system from scratch, relied on for daily operations across company departments.
- Covers HR and employee management, timesheet management, and operational workflows.
- Implemented custom business logic and workflow automation supporting live internal operations.
